DETAILED ACTION

Response to Arguments

1. In view of the Appeal Brief filed on Jan. 21, 2004, PROSECUTION IS HEREBY REOPENED. As set forth below.

2. Applicant's arguments, see "Remarks", filed Aug. 22, 2003, with respect to claims 1-2 have been fully considered and are persuasive. The rejection of claims 1-2 has been withdrawn.

In reviewing applicant's arguments and the disclosure, the examiner has concluded that the applicant has complied with rejection set forth under 35 U.S.C. 112 first and second paragraphs.

Allowable Subject Matter

3. Claims 1-2 are allowed over the prior art.

4. The following is an examiner's statement of reasons for allowance: regarding claim 1, the primary reason for the allowance of the claim is due to the fact that a structure of a peak detector comprising a track and hold circuit to input a clock signal and to output a peak signal in accordance with the clock signal as claimed. Since claim 2 depends off of claim 1, it is also allowed.

The prior art closes to the claimed invention was Hancock (5867021). However, Hancock does not disclose the above limitation. In the examiner's opinion, it would not be obvious of one ordinary skill to improve the prior art to include the above limitation to get the results of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
